

Fugro Spatial Solutions Pty Ltd

Fugro Spatial Solutions delivers complete, end-to-end solutions related to the acquisition, interpretation, management and dissemination of geospatial information.

Turning Spatial Data Into Knowledge

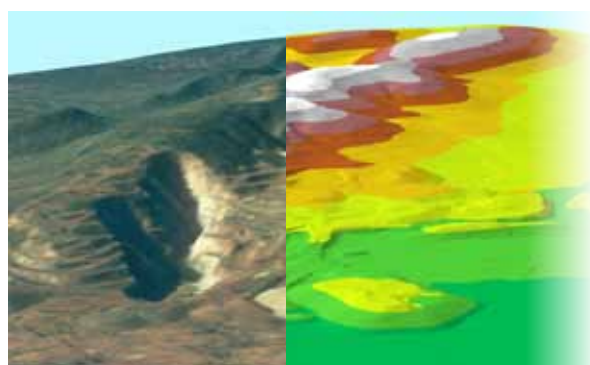

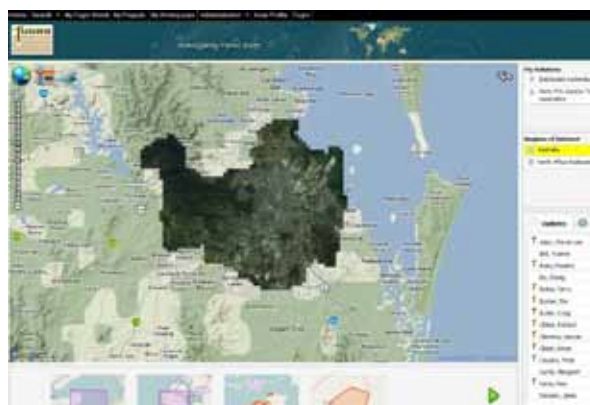

Fugro Spatial Solutions Pty Ltd works with clients to provide the geospatial information and systems required to turn spatial data into knowledge. Across the world, Fugro is working to reduce uncertainty and add value to projects that demand a unique understanding of our planet.

Public Sector Services

Whether serving local, regional, or national interests, accurate information about the earth's surface and subsurface is critical to effective governance. Fugro provides a full range of services to support these needs, including specialised solutions for users in defence and intelligence, regional and urban planning, natural resources management, environmental stewardship, marine resources, and emergency management. Fugro Spatial Solutions, part of the worldwide Fugro group, specialises in spatial services that support government requirements such as:

- Defence Mapping
- Environmental Baseline Monitoring
- Planning and visualisation
- Infrastructure Surveys
- Enterprise level Geospatial systems
- Geospatial applications development
- Geospatial data management and integration
- Topographic map updates

The spatial services used to support these requirements include Aerial Imagery, LiDAR, Satellite Data, Ground Survey and Geographic Business Solution development. Technology is rapidly changing and Fugro Spatial Solutions are at the forefront of adoption of new technology to provide security and cost effectiveness to our clients.

Public Sector Services

Aerial Survey

Fugro owns and operates a fleet of aerial survey aircraft in Australia, Asia, Europe, Africa and the Middle East, together with a full suite of imagery and LiDAR sensors to support virtually any airborne imaging, photogrammetric or topographic mapping project. The latest digital sensors and data processing technologies are used for the acquisition of high resolution vertical, infra-red and oblique imagery offering fast delivery of high accuracy aerial mapping products.

Satellite & Radar

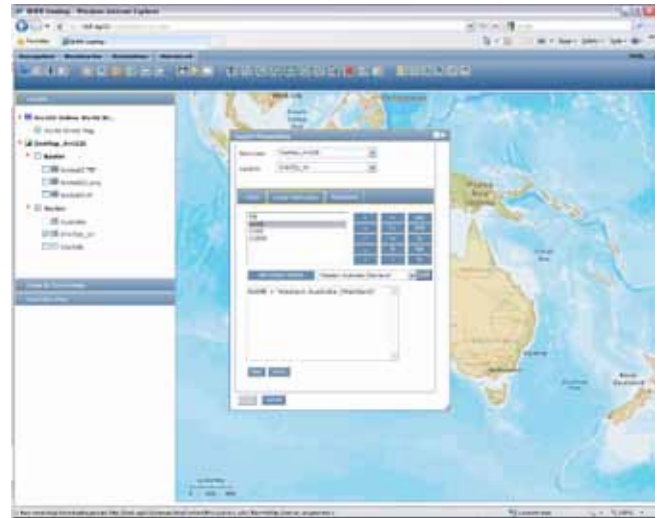

As a leading independent provider of Satellite Imagery, Radar data and Value Added Services, Fugro Spatial Solutions can acquire, process and deliver remote sensing data from a wide range of resolutions from all major satellite operators. Fugro Spatial Solutions will identify the optimal satellite data, mapping or imagery analysis techniques to fit your project scope, budget and timescale.

Land Survey

Our team of highly professional and experienced surveyors excel in the delivery of precise measurements for the mining, engineering and construction industries. Our expertise and precise electronic equipment allow for millimetre and better accuracies using dimensional control surveys as well as terrestrial laser scanning for geo monitoring and infrastructure mapping.

Geospatial Solutions

Fugro Spatial Solutions focuses on providing secure, integrated geospatial solutions and data management to government and defence clients. We work closely with our clients to deliver straightforward, cost effective solutions that answer real business needs. Our experienced team specialise in managing the data as well as being able to design and implement specialty software solutions.

The benefits of working with Fugro

Fugro has the resources, technology and operational experience to provide the right geospatial solution to public and private sector customers anywhere in the world.

- Worldwide supplier of geospatial data
- Experienced and reliable staff
- High capacity aerial fleet
- Full range of satellite mapping services
- Latest digital sensors and LiDAR sensors
- High capacity production facilities
- Land, sea and air operations
- Accreditation in
 - Quality ISO 9001
 - Safety AS-NZS 4801 and OHSAS 18001
 - Environment ISO 14001
